Tehreem Ali

has successfully completed the online, non-credit Specialization

Large Language Models

This certificate acknowledges the successful completion of the Large Language Models (LLMs) Learning Path created by H2O.ai, covering foundational to more advanced concepts in natural language processing (NLP). Graduates have gained a good knowledge in the development, data preparation, fine-tuning, and optimization of large language models using the H2O.ai GenAI ecosystem. Through hands-on experience with tools like LLM DataStudio, h2oGPT, and EvalGPT, they are equipped with practical skills to tackle complex NLP challenges and excel in AI and data science roles.
